

HOW GOD'S WONDERFUL FOR LUCENA MIRACLE CHURCH ?

Praise the Lord!

God works in a beautiful ways. We are so thankful to our Lord Jesus Christ for being so wonderful.

It is a great victory that we have now a nice church building. It started with a faith then prayer early morning and evening and a fast. Every family have fasting Day schedule weekly. We pray every day that God will bless us a lot property and a church building because the church that we are renting was so old and weak, that every time there's a storm, it shakes and made us more worried and afraid. So we release our faith and God bless us a lot property but we continued to pray hard that God will bless us a church building. It is impossible for us in those times, there are lots of how, where, when, what questions that run in everyone's mind but there's no impossible to God. We thank the Lord for God answered our deepest prayer and God used our Beloved Bishop and Ma'am White and some Elders and Pastors to sponsor from American to the church building here in Lucena and also we thank the Lord for the Navales Family to sponsor the lot property. The work of laying the foundation of the church building started last June 2015. Volunteers from different churches here in Luzon came to help us. Brethren here in Lucena help one another to build our temporary church and temporary parsonage of our Beloved Pastor and his family while others worked in the foundation of the church. With the help of Pastor Bugay, the work in our temporary church took only two weeks. Volunteers in Lucena, Calamba, Bagong Silang, Pasay and Payatas church worked with all their heart. They sacrifice their time, strength, money and talent for God's work. Digging and hammering all day with the extreme heat sometimes was very tiring but you can still see the smile on their face. As days and months passed by and slowly the ground floor were finished and so we transfer the church there. And we thank the Lord for we're able to transfer there as the rainy days continuous. We are so grateful to God for the wisdom that He gave to our Beloved Pastor to make high the foundation, so that when there's flood it will not reach inside the church unlike our temporary church that got flooded above the knee and all the things in the church was needed to put all in the pews. God is wonderful because He provided all the needs in the second floor area and it was finished and Pastor and his family were able to transfer before the storm got to wet all their things. But we continue to pray and we thank God for giving the workers strength and good health as they continue to work. We thank Jesus for taking care of the volunteers every day. Other young people here in Lucena decided to stop first this year in their studying to help and focus in building our church building. And we thank Jesus for their willingness to help and it was a big help. Young people here learned to mix cement and plastering the wall, paint the walls, help in ways they can. Even the financial sometimes got tight but we trust the Lord Almighty that He is able to finish this all. And now, this is a miracle

that God had given to us and we are so grateful for this beautiful blessing. We want to thank God for touching the heart of our Beloved Bishop and Ma'am White, helping us financially and for their prayers unto us. We thank them for their precious love and burden to all of us. We know God will bless them abundantly. We want to express how thankful we are to all the skills and volunteers and workers that worked here, they were a great help from the start until the end of building our church building. God knows your labor and we know God will reward them.

We are so grateful to God for answering our church building prayer request. For five years, the faith that we have did not wavered and the prayers and fast did not cease. Truly, God proves once again that He is a powerful God and there's no impossible to Him. Words cannot contain how much we are thankful to God for this beautiful miracle that He gave to us. Glory to God!
